EDUCATION

Anjuman Institute of Technology and Management	Bhatkal, Karnataka
Mechanical Engineering Bachelor of Engineering	2019 - 2023

Siddhartha PU College	Bhatkal, Karnataka
Computer Science Pre University Education	2017 - 2019

Anand Ashram Convent High school	Bhatkal, Karnataka
10th Grade Education	2016 - 2017

EXPERIENCE

AntStack | Frontend Developer Intern   Bengaluru, India | Feb 2025 - May 2025

- Developed scalable web applications using Next.js, TypeScript, and React Hook Form with Zod, reducing form validation errors by 30%.
- Designed reusable UI components with TanStack Table/Form and ShadCN/UI using Tailwind CSS, optimizing component –driven architecture and improving rendering speed by 25%
- Integrated AWS Amplify and AWS Cognito for secure authentication (email/password, social login: Goggle Oauth), streamlining user onboarding by 20%.
- Collaborated in Agile sprints, resolving 15+ Jira tickets and enhancing performance with designers and backend teams.

Infotech Brain's | React developer Intern   Pune, India | Dec 2024 - Feb 2025

- Built responsive web applications with Next.js, React.js, and RESTful APIs, achieving 98% cross-browser compatibility via server-side rendering and Next.js Image optimization.
- Designed reusable components using Context API, React Hooks, and React Query, reducing component re-renders by 40%
- Contributed to Agile workflows, participating in 10+ sprint planning sessions and code reviews, improving code quality by 15% with unit testing via Jest.

SKILLS

Programming Languages:	JavaScript, TypeScript, HTML, CSS, Java, Python, SQL.
Libraries/Frameworks:	React.js, Next.js, Tailwind CSS, ShadCN, Redux, React Router, Jest, Redux Toolkit, React Query, Spring, Spring Boot, Bootstrap.
Tools/Platforms:	Git, GitHub, Figma, Jira, VS Code, AWS Amplify, AWS Cognito, Prettier, NPM Postman, Eclipse IDE, Adobe, Google Cloud Console, UI/UX.
Databases:	SupaBase, MongoDB, Sql.
Methodologies:	Agile, RESTful APIs, Server-Side Rendering, Client-Side Rendering, CI/CD, Unit Testing, Code Formatting

PROJECTS

TuneHub | Java, Spring Boot, MySQL, React.js, REST APIs. | **Link**
An online music streaming web application

- Built a music streaming app with Spring Boot backend, RESTful APIs, and MySQL for data management.
- Integrated Razorpay for payments and tested features using Postman for seamless user experience.

E-com | JavaScript, React.js, Redux, React Router, Supabase. | **Link**

- Developed a responsive e-commerce platform with Supabase backend and dynamic cart functionality with CI/CD with responsive design with the animated CSS.
- Deployed on Vercel for high performance and user-friendly design.

Fast-React-Pizza | JavaScript, React.js, Redux, React Router | **Link**

- Created a pizza ordering app with location-based services and modern UI/UX using React and Redux.
- Deployed on Vercel for high performance and user-friendly design.

CERTIFICATIONS

Java full stack web developing and testing course - Kodnest
React Course 2024:Nextjs,Redux and more of 84hr - Udemy
Solved 200+ problems on Hacker Rank, Leet Code, and Striver SDE Sheet
